

DraftSEAL

Look for the green seal!

According to energy.gov "The potential energy savings from reducing drafts in a home may range from 5% to 30% per year." Past methods include messy caulk or expensive boxes. Madison's new Draft Seal is a simple, cost-effective way to achieve the same results! Simply snap Draft Seal onto a standard nonmetallic box, and attach the enclosed seal on the back. The green ring remains visible after dry wall install. Our fast, easy method complies with the IECC building code requirements for thermal performance and air leakage, reducing drafts coming in through outlets, vapors that cause mold inside walls, and sound transmission through walls.

- Works with most standard nonmetallic boxes, including shallow and deep variations
- Green ring is identifiable after dry wall install
- Eliminates the need for caulking and sealants
- Complies with IECC and LEED envelope sealing

Item#	Description	Trade Size	Inner Carton	Inner Weight	Master Carton	Master Weight
MDSK1G	1-GANG DRAFT SEAL KIT	1-GANG	12	1.98 lbs.	48	7.92 lbs.
